Whenever a document is uploaded check whether the document is having a Price Adjustment, Price Escalation, or Cost Variation clause or any details related to that.

Note down the clause details. Sometime this clause will have cross reference with some other clauses also, check what the cross reference indicates and based on the parameters listed give relevant questions related to that clause and cross reference clause.

Category	**Parameters**
Applicability	Existence, scope
Cost components	Labour, materials, fuel
Indices	WPI, CPI, labour index
Time	Base date, reference date
Calculation	Formula, coefficients
Threshold	Minimum variation
Cap	Maximum adjustment
EOT	Employer/contractor delay
Documentation	Records, notices
Risk allocation	Employer/contractor
Dispute	Claim and resolution

Based on the questions asked, give the output like, each contract is having the answers or not in 0 or 1 manner, if it is present 1 and if it is absent 0.
